

Food Situation in City Scarcity of Fuel

Publicity Curb On Profiteers

Hoover's Plan He Wires Officials in All States to Whip Unlicensed Retailers Into Line

Also Calls for Sugar Conservation

Minimum Per Capita Saving of 7 Ounces a Week Vitrally Necessary

WASHINGTON, Oct. 19.—"Publicity must control the unlicensed retailers," declared Herbert Hoover today in a telegram sent to the Federal food administrators of all the states.

The government Food Controller reiterated his conviction that retailers are not reflecting in their prices to the consumers the lowered wholesale prices of commodities, and he has appealed to the state food administrators to help in the campaign of publicity which he hopes will result in reduced cost of living to the general public. Following is Mr. Hoover's telegram:

"Representatives of every branch of the retail grocery trade met with the United States Food Administration Monday, Tuesday and Wednesday. They unanimously passed resolutions endorsing action of the President and the food administration, dealers in certain food commodities to be put under license, and expressed themselves as willing to comply with rules and regulations of food administration whether licensed or unlicensed when dealing in staple foods mentioned in President's proclamation.

"They also passed vigorous resolutions relative to economical methods that should be inaugurated in handling retail grocery business.

Wide Publicity Urged

"Mailing copies of resolutions. Give them state-wide publicity, remembering that only retailers doing a business \$100,000 annually subject to license. Publicity must control the unlicensed retailers."

Mr. Hoover also today reiterated his warning to the American public to conserve sugar, declaring it to be of vital importance to the country.

"In 1917," said a food administration statement, "the United States exported more than eighteen times as much sugar as it had averaged in the three years before the war. In 1916 these exports to our western European allies were nineteen times as great as the average for the three pre-war years. In 1916, of all our sugar exports to the western allies, 70 per cent went to England. By contrast, in 1917, France received 62 per cent of these exports.

"In 1912 our total sugar exports amounted to \$3,747,751 pounds; in 1913 to \$7,987,761 pounds; in 1914 to \$12,223,619 pounds; in 1915 to \$18,715,759 pounds; in 1916, and reached high-water mark in 1916, when the total was 1,685,895,939. In 1917 the total was 1,354,551,280 pounds. The western Allies, which in 1916 received 73 per cent of our sugar exports, in 1917 received 1,328,248,583 pounds, and in 1917 a total of 766,097,128 pounds.

Scandinavians Begin Buying

"The Northern neutrals, Sweden, Norway, Denmark and Holland, which prior to the war were purchasing no sugar from the United States, last year bought 140,944,415 pounds.

"The decrease in our sugar exports of 1916, as compared with 1917, of 41,000,000 pounds is more than accounted for by the decrease in exports to England of 7,240,000 pounds.

"The great increase in our exports to the Western Allies is directly due, of course, to the cutting off of the English imports from the Central Powers and Germany, together with the decrease in sugar crops in France and Italy.

"We practically exported no sugar to the Northern neutrals before the war. In 1917, our exports to these countries constituted 11.2 per cent of our total exports.

"In 1913 Norway imported 48,118 tons from Germany; Denmark, 9,485 tons; Holland, 23,779 tons.

England Big Consumer

"England, before the war, had the largest per capita consumption of sugar of any nation. This amounted to 93.13 pounds per person. This has now been reduced to 26 pounds per person. Prior to the war, England received 38.55 per cent of her sugar supply from Germany, 16.73 per cent from Austria-Hungary, 9.43 per cent from the Netherlands, 7.1 per cent from Cuba, and only 14 per cent from the United States.

"The United States consumption of sugar averages about 90 pounds per year per person. The Food Administration has asked the saving of 7 ounces per week per person, and if this were done it would still leave us a per capita consumption of sugar of 67 pounds per annum, as compared with the 26 pounds in England, 18 pounds in France and 12 pounds in Italy.

A delegation of Congressmen and state officials from the Northwest left Washington tonight for New York to confer to-morrow with Julius J. Barnes, president of the United States Grain Corporation, an agency of the food administration, on marketing problems. They will particularly urge changes in the methods of grading wheat.

Young and Baer, Secretary of State Calhoun, Attorney General Langer and Railroad Commissioners Aandahl, Bleick and Johnson, of North Dakota; Railroad Commissioners Jacobson and Elmquist, of Minnesota, and Railroad Commissioners Doherty, Murphy and Wells, of South Dakota, and Representative Kenton, of Minnesota.

Yale Men Interested In Golf Tournament

Despite the absence of scores of its athletes at war the members of the Yale Club is manifesting a keen interest in the annual tournament of the golf association which will be held next Thursday, October 25, over the links of the Swanley Club at Mount Vernon.

The play will be continuous through both morning and afternoon, for thirty six holes. Prizes will be awarded for the best gross 36 and best net 36 and for each of the best net 18 holes.

Coal Profiteers Menaced With Seizure of Stocks

New York Dealers, Hoarding for Time of Higher Prices, May Lose All, Is Threat From Fuel Administration; Investigation To Be Made

Coal profiteers, who are credited with hoarding large quantities of fuel, to be released at famine prices following the first visitation of zero weather, are threatened with the loss of their entire stock through government seizure.

That such a drastic move was probable became known for the first time yesterday, when the city's fuel problem passed into the hands of a coal dictator appointed by Albert H. Wiggin, State Fuel Administrator under H. A. Garfield, National Fuel Administrator, Reeve Schley was appointed fuel dictator for New York County, while the work of appointing similar officials in other counties is being rushed by the state administrator.

Plans for proceeding against persons responsible for the present coal shortage in New York will be worked out after a thorough investigation to be instituted this morning by a committee of financiers appointed by Mr. Wiggin yesterday. Offices immediately were opened at 61 Broadway and arrangements made for rushing the investigation through in the state capital of Albany, where the coal shortage is being fought.

It is expected that any recommendation of the local administrator will be accepted in Washington, with the result that no dealer will be permitted to hoard coal in order to collect exorbitant profits while the poor of the city suffer from cold.

Committee May Demand Books

While no member of the newly appointed advisory committee would divulge the investigation to be instituted today, a man in close touch with its members outlined their probable action.

"The committee has the power to demand the production of books and any records necessary to show the quantity of coal in the possession of a dealer under suspicion," he said. "In that way, it will be possible to learn just where the coal is."

"What will be the proceeding in the event that a large surplus is found in concealment?" was asked.

"Well, only the administrator could officially answer that question," was the reply.

"But I can say that any dealer who attempts to hold fuel in order to reap bigger profits than those agreed upon by the national administration will be summarily dealt with. It is probable that he will lose his entire stock, there is no possibility of making any profits at all."

Arthur E. Rice, commissioner of the Coal Merchants' Association, said: "While the shortage may be some what greater than it was at this time last year, there is enough coal coming in to meet immediate requirements. Not a dealer in the city is getting more than the regulation price for coal."

If Hoarding Is Discovered

WASHINGTON, Oct. 19.—No official report of a coal shortage in New York City has yet been communicated to the Fuel Administration, according to a statement made by Dr. Harry A. Garfield today. If such a shortage exists—and officials of the fuel administration are not sure—there is no possibility of action being taken by Washington authorities until it is officially reported by Alfred H. Wiggin, the New York State Fuel Administrator.

Fuel Administration called attention again today to the greatly increased shipments of anthracite coal to New York during the first eight months of the year over the corresponding period last year. In 1916 New York City, it was stated, received during eight months 12,650,666 tons, while this year during the same period the city received 19,000,000 tons.

If a shortage exists it is probably due to hoarding rather than the absence of a supply, in the opinion of Mr. Garfield, and if hoarding is proved the government will commandeer and distribute the supply.

If a shortage in New York supply is reported by Mr. Wiggin, it was stated, the Fuel Administration will immediately order that priority be given to shipments of New York coal from the mines.

Retailers Increased Purchases

One explanation of this seeming discrepancy in the statements of dealers who assert that the city is in the grip of a coal famine is that much of the coal shown as arriving in New York has been reshipped to Boston and New England points. But the force of this argument, say some shippers, is lost when it is shown that more than 40 per cent of the city's retail coal dealers last year received larger quantities of coal than they did in 1916.

Unofficial investigators reported that

Gamblers, Hit By Big Egg Surplus, Appeal to Government for Help

Appeal to Government for Help

CHICAGO, Oct. 19.—Caught with a great surplus of cold storage eggs on which they are losing \$400 a car at present prices, Chicago egg speculators have appealed to the government to save them, by making cold storage eggs a part of the army ration. If their plea is granted, the egg may endanger the supremacy of the army bean in the soldier's diet.

Incidentally, speculators who, last spring, when eggs were at record breaking prices, gambled on a shortage, are asking that their losses be paid out of the profits the government has made on the sale of eggs to the army. They are asking not only that the army ration be changed to accomplish this, but that the government fix the price of eggs by increasing the present market rates so as to give the speculators 10 per cent over cost.

Government reports show that there are 888,175 cases, or 26,615,250 dozen, more eggs in storage this year than a year ago. They were bought in April at an average of 37 1/2 cents a dozen. In 1916, the April storage eggs were put away at an average cost of 25 to 27 cents. Storage eggs are now selling wholesale at 33 1/2 cents a dozen, or an average loss of 2 1/2 cents a dozen, which figures up \$400 a car.

The reasons for the big surplus are

Drivers and Mediators Deadlocked In Effort to Settle Milk Strike

In Effort to Settle Milk Strike

Representatives of the city and of the State Industrial Commission conferred with officials of the Borden Milk Company and the committee of forty from the Milk Drivers' Union at the Hotel Continental, Broadway and Forty-first Street, last night, in an effort to reach an agreement whereby the 900 drivers of the company who went on strike yesterday morning would return to their wagons this morning.

Those present at the conference were Henry Moskowitz, Commissioner of City Markets; John J. Beilen, special agent of the State Industrial Commission; Charles Weiant and P. D. Fox, president and sales manager, respectively, of the Borden Milk Company, and the committee of forty from the Milk Drivers' Union.

Shortly before midnight Mr. Fox left the meeting long enough to issue a short statement on the situation. He said that while the men and the Borden company had agreed on some points,

they were seemingly at a deadlock over the demand of the milk drivers that the Borden company be made a closed shop.

The Milk Drivers' Union served an ultimatum on the Alex Campbell Milk Company yesterday, giving it until 6 o'clock to-night to meet its demands. Officers of the company said last night that they feared it would be impossible to meet the conditions laid down by the union. Unless the moderate terms to the speculators. If the army were brought into the market, however, things would be adjusted.

Packers refuse to discuss the situation. Armour & Co. said that they were not worrying about it. Officials of Swift & Co. admit that they are continuing laying much later than usual, and storage eggs were kept off the market until late. Some of the big operators are said to stand to lose fortunes if the attempt to get government aid fails.

The official government report on cold storage eggs October 1 showed total stocks of 5,758,778 cases, as against 4,867,600 cases a year ago. The dealers say the present surplus is normal, while a year ago there was a shortage.

There are thirty dozen eggs in a case. This makes the surplus on hand 173,854,800 dozen. If prices and demand were both normal this would not be alarming. The cause for worry is the drop in demand. The public is not absorbing storage eggs as formerly, even at figures which represent a loss to the speculators. If the army were brought into the market, however, things would be adjusted.

over many as they started out. It was estimated that yesterday's supply of milk was about 35,000 quarts, although not more than half the wagons are necessary to carry that amount. Little distress followed the first day of the tie-up, since those who needed milk bought in bulk from stores and from competitor companies, which quickly sold out their full supply.

Hospitals and nurseries did not suffer yesterday. When it was evident that the strike would go into effect, loyal drivers were sent to these places first. In one or two cases hospitals sent for milk.

Drivers who took out their wagons were approached by the pickets and urged to join the strike. Where the drivers proved obstinate, the milk was taken from the wagons. One or two wagons were reported to the police as stolen. There was comparatively little violence, the total of arrests for the first day being four.

Ernest Kuehl, an inspector of the Riverside branch of the company, was the only man reported violently attacked. While delivering milk on a wagon of one of the striking drivers he was pelted with stones and severely beaten before the police arrived. He was taken to Bellevue Hospital with a fractured arm.

Offers to Mediate

Dr. Henry Moskowitz, Commissioner of Markets, offered yesterday afternoon to act as mediator between the strikers and the company. Dr. Moskowitz declared that a strike affecting the distribution of milk was more serious than any other in the city. "People can walk," he commented, "but children and sick people cannot do without milk."

George W. Perkins, in a letter to Dr. Moskowitz, advocated a choice of two methods, in the first of which the city would handle the entire distribution. As an alternative he suggested that the city be divided into zones, and certain companies, under city supervision, licensed to deliver milk within these zones.

District Attorney Swann announced last night that at least two hundred retail grocery stores of the chain type will begin to-day to sell Grade B pasteurized milk direct from the Dairyman's League for 10 cents a quart. About two hundred and fifty stores will be added to the retail chain weekly until one thousand are selling milk in competition with the big distributing concerns.

Twelve Meetings To-day To Oppose Milk Price

Twelve meetings are to be held to-day in Manhattan, Brooklyn and The Bronx under the direction of the Socialistic Suffrage Campaign Committee to protest against the present high price of milk. The meetings have been arranged for mothers, several of whom will speak.

It is believed that an organized protest of mothers at the present time will result in the authorities taking action to relieve the situation.

The time and place of the various meetings follow:

Manhattan: Madison Square, noon; Rutgers Square, 2 p. m.; Hamilton Fish Park, Seventh Avenue and Avenue A, 2 p. m.; Fifth Avenue and One Hundred and Tenth Street, 2 p. m.

Brooklyn: Intervale and Wilkins Avenue, 2 p. m.; Tremont and Washington Avenue, 2 p. m.; Prospect Avenue and One Hundred and Sixty-third Street, 2 p. m.; Brook Avenue and One Hundred and Thirty-eighth Street, 2 p. m.; Cleveland Parkway and Washington Avenue, 2 p. m.

Brooklyn: Borough Park, Forty-second Street and Fourteenth Avenue, 2 p. m.; Williamsburg, South First and Havemeyer Streets, 2 p. m.; Brownsville, Pitkin and Stone Avenues, 2 p. m.
